Robert D. Prunetti
President and Chief Executive Officer
Performance Health Technologies, Inc.

Robert D. Prunetti brings two decades of management expertise, both in the public and private sector, to his current role as President and Chief Executive Officer of Performance Health Technologies, Inc. (PHT), a leading developer of performance evaluation and rehabilitation products that monitor and guide exercise and give real-time motivational feedback. Prunetti previously served as the company's Executive Vice President and Director.

He is responsible for all strategic and operational aspects of PHT and guiding the company's continued growth by focusing on the commercialization of innovative products that improve patients' care while also reducing associated costs.

Prunetti draws on leadership, management and policymaking skills developed over a public service career spanning more than two decades, culminating with a tenure as Mercer County Executive from 1992 -2003.

In that leadership position for twelve years, he forged a close relationship with Mercer County's business community, implementing an aggressive program of economic growth, job creation and urban redevelopment aimed at strengthening Mercer County's economy and revitalizing New Jersey's capital city.

Prior to his election as County Executive, Prunetti served as Mercer County Budget Director, Director of Policy and Planning for the New Jersey Department of Human Services, Hopewell Township Administrator and Mercer County Freeholder.

Prunetti's public service career left a lasting mark through his successful development of the Mercer County Waterfront Park, Sovereign Bank Arena, Mercer County Open Space Preservation Trust Fund, and the establishment of a free trade Zone and International Trade Center located at Trenton-Mercer Airport.

A graduate of the College of New Jersey and New York University, he lives in Ewing, N.J. with his wife, Maryanne, daughter, Dominique, and son, Robert, Jr.
