

Comfy™ Air Hand Orthosis. The ideal splint for the severely contracted hand. Adjustable air bladder allows for gradual extension of the MP, DIP and PIP joints. Adjustable wrist and forearm for customized fit. Simply insert the un-inflated splint with the bladder under the fingers and then pump air to inflate the bladder and increase finger extension. Hand bladder can be used separately without full orthosis as needed. Well padded, comfortable, navy blue headliner material cover can be removed for easy laundering. Designed by a therapist. Ambidextrous.
