**Pre/Post Wound & Burn Care Kit**

**Indications:** skin breakdown, ulcers, turf toe, blisters, pressure sores
(at the first site of pressure sore place gel over skin to prevent further breakdown)

**Post Wound Care/Burn Care:** Once wound is closed, place gels on skin to help prevent re-opening

**Silipos Gel products diffuse medical grade mineral oil that provides moisturization & elasticity to the skin to promote healing**

**Gel moves independently so it will not cause friction like silicone**

Who should keep this on hand:
Home Care Nurses | Schools | Podiatrists | Athletic Trainers | Hospitals Wound Care Dept | PT/OT Department | Wound Care Clinics | Burn Units
