

# Products for Acute Care / Home Care / Burn Applications

## Why Buy Silipos® Brand Products vs. Imitation

Silipos® Gels have been skin tested by an independent testing laboratory for skin sensitivity -- Silipos® Gels are made in the USA -- Silipos® has FDA 510(K) acceptance.

**SILIPOS®** gels are used Pre Wound Care when the patient is prone to skin breakdown and ulcers.

**SILIPOS®** gels are used Post Wound Care when the patient has obtained skin closure from a wound.

**SILIPOS®** gels are used as a Burn Treatment once wound is closed. The gel diffuses a medical grade mineral to the skin which provides moisturization promoting healing and elasticity to the skin. Patient's skin sensitivity is protected.

**SILIPOS®** gels are different from Silicone in that the Gel side that is next to the skin moves independently from the remaining gel. In this way, the gel moves with the skin and does not cause any friction (as does Silicone).

**SILIPOS®** gels incorporate a medical grade mineral oil that diffuses onto the skin gradually and provides constant moisturization. In this way, the elasticity begins to return to the skin and faster healing is promoted. If compression is needed, simply use a wrap over the gel.

**SILIPOS®** products can be reused and washed with soap and water.

**SILIPOS®** gels should not be placed over open wounds.

**SILIPOS®** products must be removed for at least 4 hours due to its occlusive environment. Usually day or night use is recommended – depending on location of wound.

### Suggested Silipos products:

Heel/Elbow Slipover/Half Gel Coated Body Sleeving/Body Discs/Digital Caps/Tubing/Soft Shear Sheeting-One Sided/4x4 squares w/adhesive
