Avoid applying electrodes on hair, tender, or damaged skin. Do not apply electrodes to damaged, chapped, or abraded skin. Do not apply electrodes over hair. Do not apply electrodes to hair or skin of the head. Do not apply electrodes to hair or skin of the face.

WARNING AND PRECAUTIONS

• Do not use the treatment in the presence of flammable gases.
• Do not use the treatment in the presence of flammable liquids.
• Do not use the treatment in the presence of flammable solids.
• Do not use the treatment in the presence of flammable vapors.
• Do not use the treatment in the presence of flammable aerosols.
• Do not use the treatment in the presence of flammable dusts.
• Do not use the treatment in the presence of flammable fumes.
• Do not use the treatment in the presence of flammable sprays.
• Do not use the treatment in the presence of flammable solutions.
• Do not use the treatment in the presence of flammable powders.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
• Do not use the treatment in the presence of flammable resins.
• Do not use the treatment in the presence of flammable glues.
• Do not use the treatment in the presence of flammable cements.
• Do not use the treatment in the presence of flammable adhesives.
• Do not use the treatment in the presence of flammable paints.
• Do not use the treatment in the presence of flammable varnishes.
• Do not use the treatment in the presence of flammable lacquers.
