

CARDIO GYM[®] CG2

The CARDIOGYM CG2, dual trainer has been designed for exercise rehabilitation with its revolutionary **Motorised Weight Selection System**. Users conveniently select the desired weight from a push of a button, making CG2 safer and easier to use.

Our adjustable dual pulley system gives more options to perform hundreds of exercises, and independent dual weight stack allows for multiple users.

Select targets and monitor performance with the CG2 console counting repetitions and time either up or down.

- VARIETY
Dual pulley combo offers more angles and variation
- CONVENIENCE
Select the desired weight with a push of a button
- SAFETY
Enclosed weight shrouds make for safer use
- GOAL SETTING
Monitor performance with the CG2 console counting repetitions and time.
