There are over 1 million cases of catheter-associated urinary tract infections (CAUTI) in hospitals and nursing homes annually. Costs associated with CAUTI range from $758 to $1,006 per incident and are not reimbursable by CMS.

Reduce Unnecessary Catheterization and Prevent CAUTI

CAUTI Risks

There are over 1 million cases of catheter-associated urinary tract infections (CAUTI) in hospitals and nursing homes annually. Costs associated with CAUTI range from $758 to $1,006 per incident and are not reimbursable by CMS.

Prevention

The ViewBladder 10 is an ultrasound imaging system that displays a real-time image of the bladder. This enables the user to accurately calculate the volume of urine to help determine the necessity of catheterization. Bladder ultrasound devices have been shown to reduce catheterization rates up to 50%.
ViewBladder 10

Non-invasive – lower risk of infection than catheterization

No Discomfort to Patient – no pain or embarrassment that’s associated with catheterization

Easy to Administer – how-to videos are loaded on the unit

Superior Accuracy – +/- 10% accuracy as compared to +/- 15% of other units

Time Saver – 3 minutes for scan vs. 15 minutes for catheterization

Immediate Results – real time image

Printable Reports – patient information, images and bladder volume

Complete System – everything you need, ready out of the box

Best Value – less expensive than similar devices

ViewBladder 10
#0815-63-824
