

ORTHOPEDICS

CMC CONTROLLER PLUS

An innovative low-profile design, offering both functionality and effective pain relief with optimal positioning. Users benefit from enhanced hand function and comfort, addressing discomfort through thoughtful design. Specifically engineered for thumb CMC joint dysfunction, it provides targeted support and rehabilitation for conditions like arthritis or injury.

Key Features:

- Completely trimmable allowing customization for each patient
- The patient assist strap makes for simple one-handed application
- Design leaves wrist and fingers free for unrestricted motion
- Two sizes, right and left, reduces inventory
