K-TAPE CROSTAPE

K-Tape Crosstape is used on trigger points, areas and points of pain, scars, tense muscles or painful joints to treat pain and tension. It is a non-invasive way to stimulate acupuncture points and can be used as an alternative to needles for acupuncture or dry needling. Crosstape can also be applied after needling to provide extended treatment of the needed areas.

Key Features:

- Crosstape patches are drug-free and do not contain active ingredients
- Available in 4 sizes, water-resistant and can be worn for several days
- Made of dual mixed fibers; electrostatically charged when peeled off
- Patch can be applied to local pain point or placed over larger areas
