

AIDS TO DAILY LIVING

obi

OBİ ROBOTIC FEEDER ADAPTIVE SELF FEEDING DEVICE

Integrating advanced robotics, sleek design, user-friendly controls, and a welcoming personality, Obi empowers those reliant on others for meals to regain control over their dining experience both at home and in public. Capable of selecting properly sized food from four compartments and delivering it to one of numerous locations, allowing the diner to feed themselves.

Key Features:

- Ideal for those with upper extremity limitations
- Easy to clean between uses, lightweight, and portable for use at home or to pack up and eat on the go
- Comes with a plate, placemat, large spoon, small spoon, charger, two (2) button switches, a quick start guide, and instructions for use
