

## SAMMONS PRESTON KNEE SLEEVE

Sammons Preston Knee Sleeve is a neoprene compression sleeve with open knee design for added comfort around the patella. The knee sleeve is indicated for soft tissue knee injuries including sprains, strains, ligament instability and patellar tendonitis. For proper use, grasp the edges of the sleeve at the larger opening and pull sleeve on to the knee so that the opening of the knee is centered on the knee cap.

### Key Features:

- Indications: for soft tissue knee injuries like sprains, strains, ligament instability, and patellar tendonitis
- Open patella design helps improve patellar tracking and reduce knee pain
- Neoprene construction delivers therapeutic warmth and compression
- Sizing based on circumference 6" above the mid patella

SKU	Item Name	Specifications
081546332	Small	15"-17.5"
