

SAMMONS PRESTON R-SOFT WRIST SUPPORT

The Sammons Preston R-Soft Wrist Support is extremely soft and comfortable to increase patient comfortability. Indicated when wrist immobilization and full hand function are desired. Contouring allows for full finger function and palmar spread. Removable, adjustable palmar stay allows further customization. Sizing based on wrist circumference.

Key Features:

- Ideal when support is needed without restricting finger movement
- Removable, adjustable palm stay
- Generous thumb opening permits freedom of movement
- Loop & lock closure
