## SAMMONS PRESTON UNIVERSAL ARM SLING

The Sammons Preston Universal Arm Sling is designed to position the user's arm to help prevent further injury and ensure proper treatment. The soft padding on the shoulder strap improves patient comfort, and the woven straps with adjustable hook & loop closures allows the sling to fit most users. Suitable for forearm fractures, humerus fractures and wrist pain.

**Key Features:**

- Indication: For supporting and immobilizing the arm following injury or surgery and to protect against further injury during healing
- Support & Comfort: Stabilizes wrist, elbow, and shoulder
- Support & Comfort: Stabilizes wrist, elbow, and shoulder
- Universal Fit: One size fits most
