

Shell Games

When it comes to vestibular stimulation and sensory integration programs, don't gamble with just any equipment. Choose a program you and your special needs child are sure to love...the new Tortoise Shell from Preston.

It offers such therapeutic benefits as tactile awareness and desensitization, kinesthetic feedback, and righting reactions. And, what's more, *it's fun!*

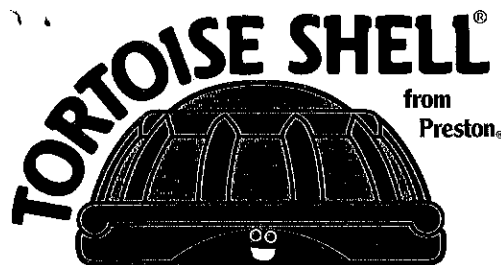

Your special needs children will love rocking in the colorful shell, rolling balls along the grooved lid, or swinging and spinning in a suspended shell. With

over a dozen configurations, you'll never run out of ideas for fun, safe activities.

The Tortoise Shell comes complete with lid, optional 2-inch Bubble Balls and suspension kit. It's recommended for use with children up to five years of age.

The Tortoise Shell from Preston — finally one shell game you're guaranteed to win.

THE Tortoise Shell®

THE TORTOISE SHELL®

From Preston®

A colorful molded polyethylene shell that can be used for vestibular therapy and sensory integration. The Tortoise Shell is ideally suited for children 0-5 years old in early intervention programs. The lid can be used as a recessed base to prevent the shell from rocking, or on top as a flat surface for vestibular therapy.

The Tortoise Shell is excellent for a single child or for group activities. It is portable, easily cleaned, and measures 36 in. (91 cm) across x 18 in. (46 cm) high.

PC 2885 *The Tortoise Shell*

THE DELUXE TORTOISE SHELL®

From Preston®

Includes the colorful Tortoise Shell with lid and snug fitting net filled with 2 in. Bubble Balls. Net is designed to fit on Shell and makes removal of balls easy for cleaning or storage. Balls provide bouyancy and sensory feedback for the child.

PC 2886 *Includes Tortoise Shell and net with balls*

PC 2885B *Replacement net with balls*

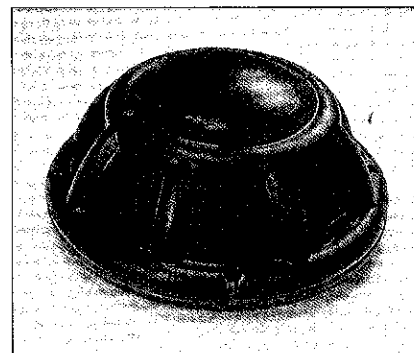

PC 2855C *Includes Tortoise Shell, net with balls and suspension kit*

TORTOISE SHELL® SUSPENSION KIT

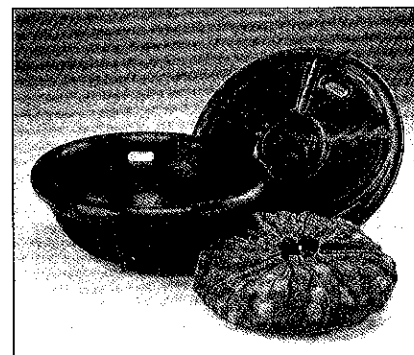

From Preston®

The Tortoise Shell or Deluxe Tortoise Shell may be suspended from the Vestibulator II® — PC 2784F with the PC 2885R Suspension Kit. The Kit includes all ropes and hooks necessary to attach the Tortoise Shell to the Vestibulator swing arm.
