Box Includes:

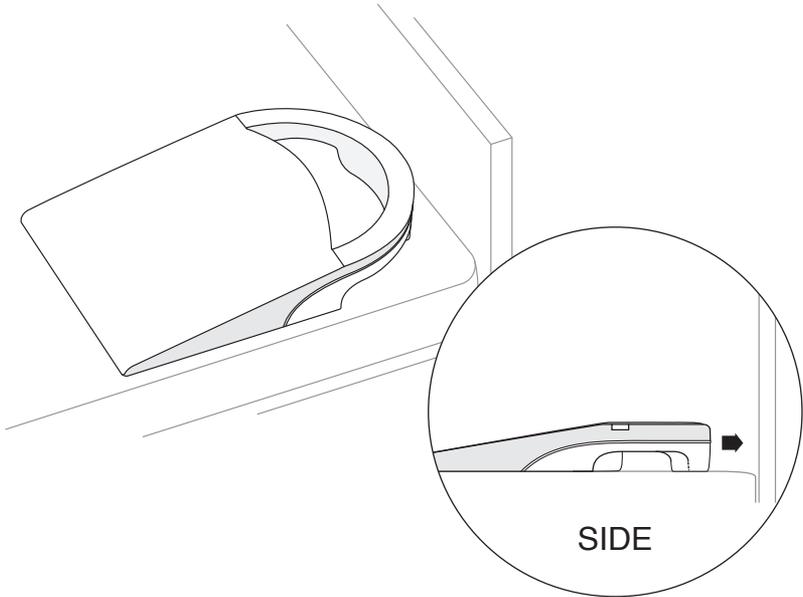

1. Body Pillow
2. Base Wedge
3. Insert Pillow
4. Comfort Guide

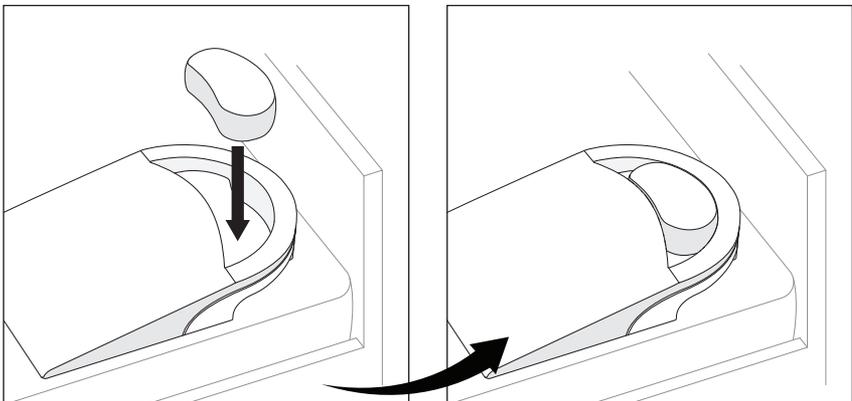

NOTE: Foam components have been compressed for shipment. Please allow up to 24 hours after opening for full shape recovery and for natural, new foam smell to dissipate.

Setup and Assembly

- 1** Place the Base Wedge on either side of the bed, as illustrated below.

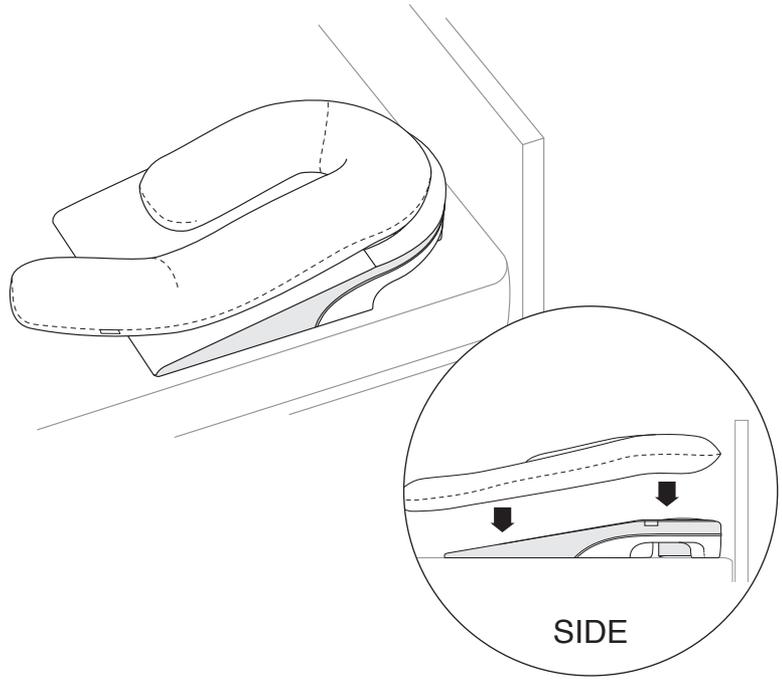

- 2** Place the Insert Pillow into the inner cavity of the Base Wedge. (Compressed Insert Pillow will require shaking and re-fluffing to regain shape.)

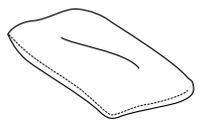

3

Place the Body Pillow on top and in the center of the Base Wedge, as shown.

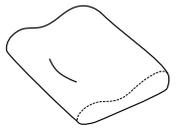

NOTE: MedCline LP can be used with a variety of pillow types. Some users find that using their own, familiar pillow is a good alternative as they are getting used to the new sleep position.

Standard Pillow

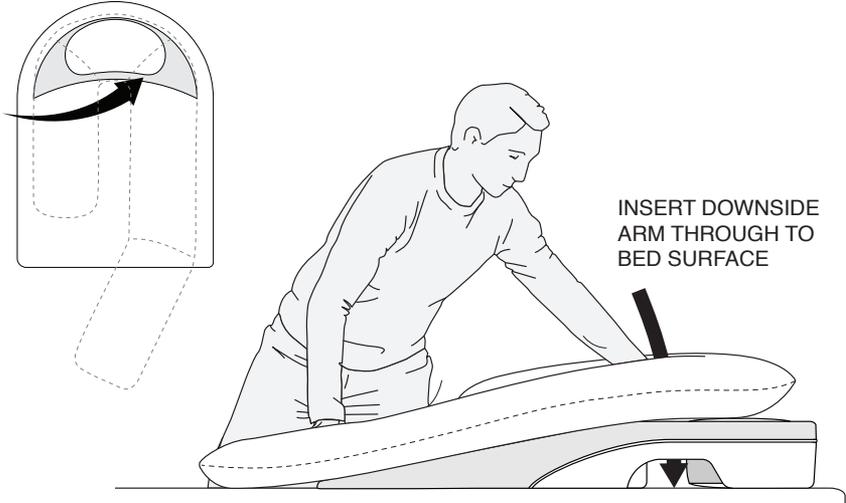

Contour Neck Pillow

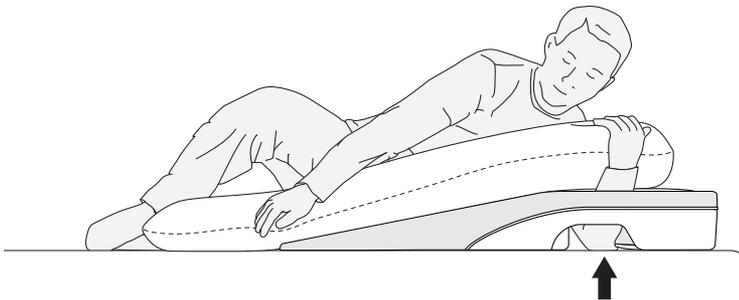

Proper Positioning

- 1** Insert your downside arm into the space between the Insert Pillow and the Base Wedge.

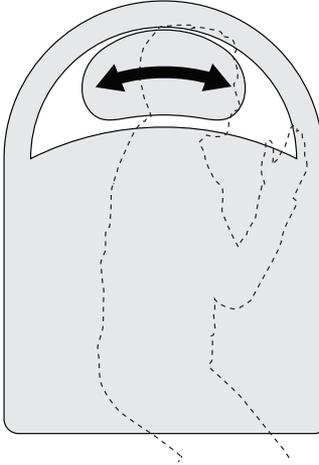

- 2** Lie down while allowing your elbow to descend and ultimately rest on the bed surface. Once your body has settled, your downside arm and shoulder should no longer be supporting your weight.

3

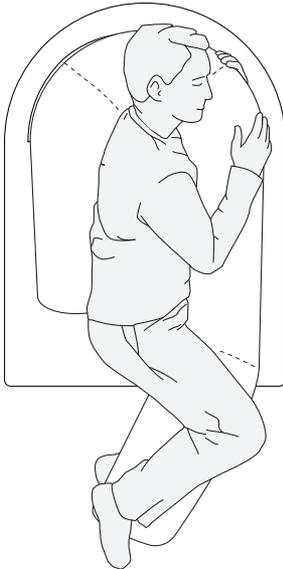

The Insert Pillow is designed to move within the cavity of the Base Wedge. Move to add support where you need it.

INSERT PILLOW IS
DESIGNED TO MOVE
WITHIN THE CAVITY

4

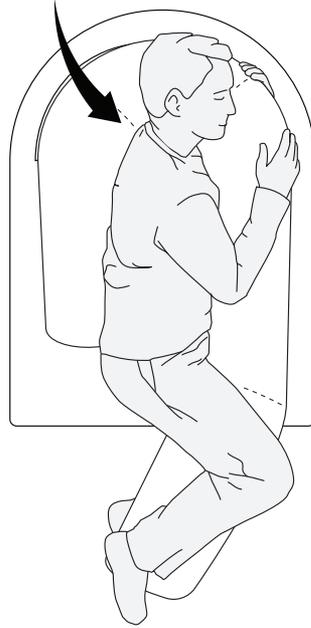

Ensure that your arm is straight down inside the pocket so there is no pressure on your armpit or underside of your downside arm. You may need to scoot up the incline to accomplish this.

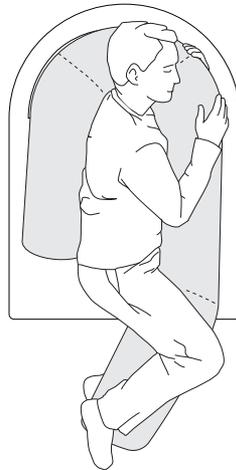

SCOOT UP THE WEDGE
TO RELIEVE ANY
UNDERARM PRESSURE
THAT MAY PREVENT
PROPER CIRCULATION
TO YOUR ARM

5 Like any new sleeping arrangement, some time may be required to get used to MedCline LP. Try various positions until you are comfortable and able to relax.

MOVE PILLOW TO FAMILIAR OR PREFERRED LOCATION TO PROPERLY SUPPORT HEAD AND NECK.

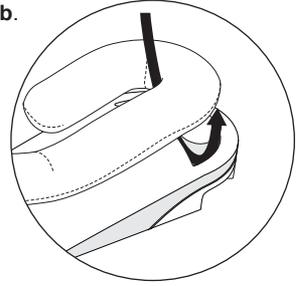

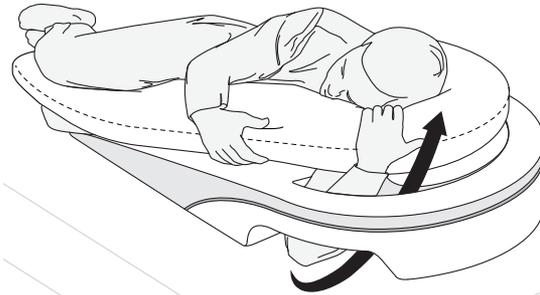

NOTE: The long limb of the Body Pillow can be used in front of you or behind you in both the left-side down and right-side down positions.

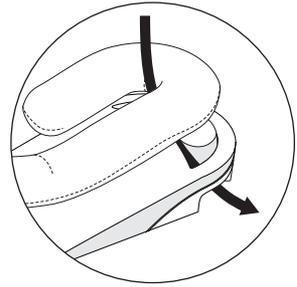

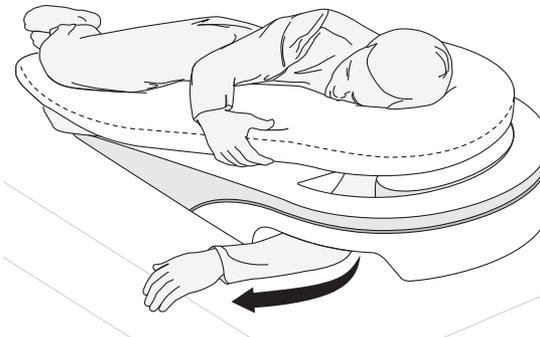

6 Find a comfortable position for your hands and arms using either position **a** or **b** shown below:

a This position is recommended, if you find yourself sliding down or if your hand falls asleep in position **b**.

b This position is recommended, if you have longer arms or otherwise feel restricted in position **a**.
