

DLOTCA™ Battery – Dynamic Loewenstein Occupational Therapy Cognitive Assessment

- Enables a therapist to evaluate clients with neurological deficits to obtain a detailed cognitive profile
 - Enables intervention planning for management and maintenance
 - Incorporates a dynamic component providing the ability to measure learning potential and recognize thinking strategies through the use of mediation
 - Allows the therapist to identify the level of awareness the client has to his/her condition and cognitive disability
 - Includes computerized scoring
-
- **DLOTCA™** is designed to be used with clients aged 18-69 years old. It consists of 28 subtests in 7 cognitive areas: Orientation, Awareness, Visual Perception, Spatial Perception, Praxis, Visuomotor Construction and Thinking Operations.
 - **DLOTCA-G™** is designed to be used with clients aged 70 and over and specifically addresses physical and mental factors that can accompany aging by offering larger components, reduced pictorial detail, multiple choice questions and shorter administration time. It consists of 24 subtests in 8 cognitive areas: Orientation, Awareness, Visual Perception, Spatial Perception, Praxis, Visuomotor Construction, Thinking Operations and Memory.
